

OLUWABUKUNMI ODUKOYA

PROFESSIONAL SUMMARY

Backend Developer with practical experience delivering backend systems for web applications, internal platforms, and blockchain-enabled products. Proficient in Python, Django, RESTful APIs, and structured GitHub workflows, with exposure to Web3 and crypto-payment systems. Known for clear problem-solving, clean backend design, and the ability to work independently or within fast-moving teams. Seeking a backend role focused on building reliable, scalable systems in production environments.

EXPERIENCE

IGHODALO LABS – Senior Developer

- December 2025 – PRESENT
- Implemented structured development workflows using GitHub, feature branches, and pull requests.
- Introduced task tracking and progress monitoring using Trello boards.
- Oversaw development and production environment separation for internal projects.
- Reviewed and improved backend code quality across ongoing projects.

PAYCREST – Blockchain Developer Intern

May 2024 – August 2024

- Conducted code reviews, improving code quality and reducing bugs.
- Implemented blockchain solutions, reducing operational costs by 30%
- Developed smart contracts, enhancing transaction efficiency by 30%
- Collaborated on a decentralized app
- Gained hands-on experience with Ethereum and Hyperledger technologies.

INFORMATION TECHNOLOGY AND MEDIA SERVICES, UNIVERSITY OF IBADAN – Backend Developer Intern

September 2024 – May 2025

- Designed and built a backend system to track student ID card readiness and collection
- Ensured data consistency and accurate representation of real-world processes
- Developed as part of an academic and institutional project
- Implemented student lookup, status updates, and administrative workflows

RENAGER – Backend Developer Intern

August 2021 - October 2022

- Integrated third-party services, expanding functionality and user engagement.
- Collaborated with frontend teams, ensuring seamless user experiences and designs.
- Developed robust security protocols, safeguarding user data and privacy.
- Implemented microservices architecture, enhancing system reliability and speed.

PANDA TECH – Backend Developer

July 2025 - December 2025

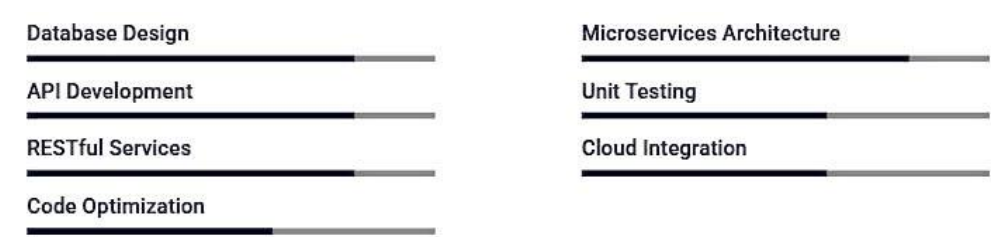

- Designed scalable APIs, boosting app performance.
- Conducted code reviews, improving code quality and maintainability.
- Utilized cloud services, increasing system availability and scalability.
- Worked with token-related data, wallet concepts, and blockchain-related events

EDUCATION

University of Ibadan, Ibadan – Bachelor’s Degree in Computer Science

2020 - 2025

SKILLS

ADDITIONAL INFORMATION

- Strong willingness to learn and adapt to new backend technologies
- Comfortable working with limited supervision
- Focused on building stable, well-structured backend systems
